

Sensitive Skin

Taming Whipped Cream

The Sensitive Skin Taming Whipped Cream has been formulated to provide short-term and extended relief of irritated and stressed skin. A combination of actives works to reduce skin sensitivity caused by emotional, environmental and mechanical stressors while promoting an uplifted and relaxed state-of-mind. Its light texture and combination of active ingredients makes it well suited for full body application: from face to underarm to legs.

Trade Name	Benefit in Formula
Happy Skin Liposoluble Provital	Induces beta endorphin synthesis to improve mood and relaxation to the skin. Also, has antioxidant properties to protect from free radical damage.
BEL-EVEN™ DSM	Counteracts and future-proofs the skin from the damaging effects of stress by rebalancing cortisol levels. Skin elasticity, density and barrier functionality are all improved.
Dermasooth™ Provital	Calms and soothes irritated skin while providing long-term reduction of skin sensitivity caused by mechanical damage. Both intensity and area of irritation are reduced, and skin is more resistant to future aggression as the barrier function is improved.
ALPAFLOR® SCUTELLARIA AO DSM	Lipid production and key receptors for the mitigation of pain sensation are increased for both extended skin hydration and relief of sensitive skin symptoms. Increased beta endorphin production provides an enhanced sense of happiness.

Sensitive Skin

Taming Whipped Cream

a	PHASE A	INCI NAME	%W/W
	Deionized Water	Water	76.80

b	PHASE B	INCI NAME	%W/W
	¹ Makimousse 25	Sodium Polyacrylate Starch	1.00
	Propanediol	Propanediol	5.00
	² Keltrol® CG-T	Xanthan Gum	0.20
	Pentylene Glycol	Pentylene Glycol	3.00

c	PHASE C	INCI NAME	%W/W
	³ Olivem® 1000	Cetearyl Oliviate, Sorbitan Oliviate	4.00
	Caprylic/Capric Triglyceride	Caprylic/Capric Triglyceride	3.00
	⁴ Cetiol® C5	Coco-Caprylate	2.00

d	PHASE D	INCI NAME	%W/W
	⁵ Happy Skin Liposoluble	Helianthus Annus (Sunflower) Seed Oil, Rhodiola Rosea Root Extract	1.00
	Citric Acid 25% Solution	Citric Acid	qs

e	PHASE E	INCI NAME	%W/W
	⁶ BEL-EVEN™	Biphenyl Azepanyl Methanone	1.00
	⁵ Dermo soothing™	Propanediol, Water, Enteromorpha Compressa Extract, Silybum Marianum Fruit Extract, Ocimum Sanctum Leaf Extract	1.00
	⁶ ALPAFLOR® - SCUTELLARIA AO	Glycerin, Water, Scutellaria Alpina Flower/Leaf/ Stem Extract	1.00
	⁷ Diocide™	Caprylyl Glycol, Phenoxyethanol, Hexylene Glycol	1.00

PROCEDURE:

Heat water of Phase A to 75°C and mix Phase B separately until uniform. When phase A reaches 60°C, add B to A and continue heating to 75°C. Heat C to 80°C with mixing. When Phase C reaches 80°C, add phase C to phase AB with high shear mixing (homogenize if available). Begin to cool continuing rapid agitation. Add Happy Skin Liposoluble to Emulsion at 60°C and adjust pH to 5.0 - 5.5. Let cool to <40°C and add Phase E. Mix until uniform and adjust to final pH 5-5.5.
